3/30/05
- 1.(Currently Amended) A method of portably handling a movie comprising:
 storing ~~an electronically readable~~ a digital movie into a portable digital movie storage module including an atomic resolution storage memory component;
 connecting the portable digital movie storage module to a portable digital movie playback device;
 recalling selectively the digital movie from the memory component of the portable digital storage module into the portable digital movie playback device; and
 displaying the digital movie on the portable digital movie playback device.
 - 2.(Currently Amended) The method of claim 1, wherein storing ~~electronically readable~~ the digital movie further comprises:
 transferring a copy of the movie from a movie purchase center into the memory component of the portable storage module.
 - 3.(Currently Amended) The method of claim 2, wherein storing ~~electronically readable~~ the digital movie further comprises:
 downloading the movie from a remotely located centralized movie database.
 - 4.(Currently Amended) The method of claim 1 and further comprising:
 repeating the storing step to capture additional ~~electronically readable~~ digital movies into the memory component of the storage module.
 - 5.(Previously Presented) The method of claim 1 wherein recalling selectively the movie further comprises the playback device including at least one of a notebook computer, a personal movie player, and a seatback-mounted movie viewer.
